#### Cotton Varieties Planted, United States 1991 Crop

Deltapine owned varieties were the most popular upland cotton planted in the United States for the 1991-92 season, according to the Cotton Division, Agricultural Marketing Service, USDA. Cargill owned varieties were the second most popular followed by Stoneville, Acala, Tamcot and Germain's.

Deltapine owned varieties were the most popular planted in 1991, accounting for 43.7 percent of the United States acreage. These varieties lead in Alabama, Arizona, Arkansas, Georgia, Louisiana, Mississippi, Missouri, North Carolina, South Carolina and Tennessee. The most popular Deltapine variety was Deltapine 50 which accounted for over 17 percent of the United States acreage planted.

Cargill owned varieties were the second most popular planted in 1991, accounting for 23.6 percent of the United States acreage. These varieties were the most popular planted in Oklahoma and Texas and were the second most popular in New Mexico. Paymaster HS 26 was the most popular Cargill owned variety and accounted for about 15 percent of the U.S. acreage.

Stoneville owned varieties were the third most popular planted in 1991. These varieties accounted for 7.0 percent of the U.S. acreage. These varieties were the second most popular planted in Alabama, Arkansas, Georgia, Louisiana, Mississippi, Missouri, North Carolina, South Carolina and Tennessee. The leading Stoneville variety was Stoneville 453, accounting for 3 percent of the U.S. acreage planted.

Acala varieties were the next most popular and accounted for 4.2 percent of the acreage planted in 1991. Acala varieties were the most popular planted in California and New Mexico. Acala SJ-2 was the most popular variety of Acala planted and accounted for about 3 percent of the U.S. acreage.

Tamcot varieties were the fifth most popular group planted in 1991, accounting for 3.8 percent of the U.S. acreage. Tamcot was the second most popular variety group in Oklahoma. The most popular Tamcot variety was Tamcot CAB-CS which accounted for over one percent of the U.S. acreage.

Germain's were the sixth most popular varieties planted and accounted for 3.2 percent of the 1991 acreage. Germain's Acala GC-510 was their most popular, at 2.7 percent of the total U.S. acreage.

Other variety groups accounting for one percent or more of United States 1991 cotton plantings included: All-Tex, Growers, Hyperformer, Rosebud and Seedco.

Pima S-6 was the most popular American Pima variety planted in 1991. This variety accounted for 98.6 percent of the United States acreage and accounted for virtually 100 percent of the American Pima acreage in California, New Mexico and Texas and about 97 percent of the Arizona acreage. Pima S-5 accounted for about 3 percent of the Arizona acreage.

Estimates of the percentage of the various varieties of cotton planted in the United States for 1991 by counties, classing offices and states are presented in this report. The variety data are based primarily on estimates furnished by cotton ginners for the territories served by their gins.

Estimated percentage of upland cotton acreage planted to leading specified varieties, by growth areas, 1991 crop
